📍 Kaunas, Lithuania

## 📁 Professional Summary

Experienced Front-End Engineer with over 8 years in web development, specializing in Vue.js, Nuxt, and React. Skilled in implementing and designing scalable web applications, with expertise in API integration, automated testing, and UI/UX development. Demonstrated success in building e-commerce and internal platforms that prioritise user experience, security, and responsiveness.

## ⚙️ Skills

**Front-end:** Javascript, Typescript, Vue.js, Nuxt, React, Next.js, React-admin

**API Integration:** REST, GraphQL, CMS Strapi

**Testing & CI/CD:** Cypress E2E, Storybook, Feature Flags

**UI/UX Tools:** Tailwind, PrimeVue, Material UI, Figma

## 📄 Work experience

2016 - Present  
(8+ years)

**TeleSoftas (Kaunas, Lithuania)**  
Senior Front-end engineer

### Projects:

**Ole** (2024-2024)

**Project Overview:** Developed a support chat functionality, incorporating an AI chatbot Meta's Llama 3.1 70B API to enhance customer support and engagement. The web page featured user sign-in flow, parts listing, and detailed information screens.

**Role & Responsibilities:** Developed frontend from Figma designs, integrated Storybook. Conducted research and integrated the Unleash feature flags service. Regularly maintained and updated frontend libraries and connected APIs to ensure frontend-backend data flow. Was responsible for estimating tasks and presenting demos.

**Tools & Technologies:** Nuxt v3, PrimeVue v4 with Figma UI KIT, Tailwind, Storybook, Feature Flags.

## Work experience

### **Kurt Koenig, E-shop** (2022 - 2024) ( <https://kurt-koenig.com/de> )

**Project Overview:** Built the second version of a B2B e-commerce platform using the Nuxt SSR framework, focusing on internationalization, SEO, and custom content management. The project enabled international transactions and advanced e-commerce functionalities.

**Role & Responsibilities:** Led front-end development, helped creating and utilized a custom component library, helped integrating Strapi CMS, payment systems (PayPal, Stripe), Trusted Shop, and Softgarden Talent Acquisition Software. Facilitated migration from REST to GraphQL and helped supporting CI/CD E2E testing.

**Tools & Technologies:** Nuxt v3, Tailwind, REST and GraphQL (Apollo) integration, Strapi v4 CMS, Sentry, Feature flags, Cypress E2E.

### **Employee portal for Kurt Koenig** (2021 - 2022) ( <https://employee.kurt-koenig.com> )

**Project Overview:** Developed a SPA employee portal for client and order management using Vue.js. The system allows creating orders for clients using their available credit. It was primarily designed for use on tablets.

**Role & Responsibilities:** Built a responsive UI from scratch with Vue.js, implemented a reusable component library which was reused building e-shop and supported API migration from REST to GraphQL. Helped supporting E2E testing.

**Tools & Technologies:** Vue.js, Tailwind, reusable component library, REST and GraphQL (Apollo) integration, Storybook, Sentry, Feature flags, Cypress E2E..

### **Kurt Koenig E-shop v1** (2021 - 2021)

**Project Overview:** Created the initial version of Kurt Koenig's B2B e-commerce platform using Sylius eCommerce PHP framework with Blade templating. Integrated Vue.js components for reactive features.

**Role & Responsibilities:** Developed UI elements to support business needs. Managed project migration due to ERP and tech stack changes in the next phase.

**Tools & Technologies:** Vue.js, Sylius, Blade, Tailwind, Feature flags.

### **Kurts toolbox** (2019 - 2021) ( <https://portal.kurts.de> )

**Project Overview:** Developed SPA admin panel for managing an online tool rental service, used in iOS and Android apps. Included functionalities for managing products, clients, and rental locations, supporting QR code scanning and user roles.

**Role & Responsibilities:** As the sole front-end developer, created over 15 forms for data management, implemented dark/light themes. Solely responsible for fully integrating automated testing. Initially built on React-Admin v2 and later rewritten in v3.

**Tools & Technologies:** React, React-Admin, Material UI, Feature Flags, Sentry, Cypress.

## Work experience

**Contributed to various other TeleSoftas projects:** (2016 - 2019)

- Representational websites (Wordpress) (<https://telesoftas.com/stepforward/>, <https://telesoftas.com>)
- Auction web system (React, GraphQL)
- Offers/market platform (React, REST)
- Charity website (Wordpress, PaySera)
- Medicine e-shop theming (Wordpress, WooCommerce)
- Meeting room reservation system (AngularJs)

## Language

- Lithuanian (Native)
- English (Proficient, spoken and written)

## Education & Certificates

### Certificate of completion

**The Mastering Nuxt 3 Course** (2023)

(<https://masteringnuxt.com>)

[Certificate](#)

**Kaunas University of Technology** (2013 - 2017)

Bachelor of Software Systems

**Telesoftas Summer Camp** (2016)

Completed a three-month front-end development course, focusing on the AngularJs framework and enhancing skills in JavaScript, HTML, and SASS.

**Devbridge Sourcery Academy** (2015)

Completed a three-month course. This experience marked my first encounter with React and ASP.NET technologies.

## Professional Attributes

### Detail-Oriented

I thrive on precision and accuracy. I'm the kind of person who notices the small things that others might miss.

### Innovation seeker

I'm always eager to explore and adopt new tools and technologies. I enjoy discovering the latest trends and finding innovative ways to apply them.
